

Project Development Phase

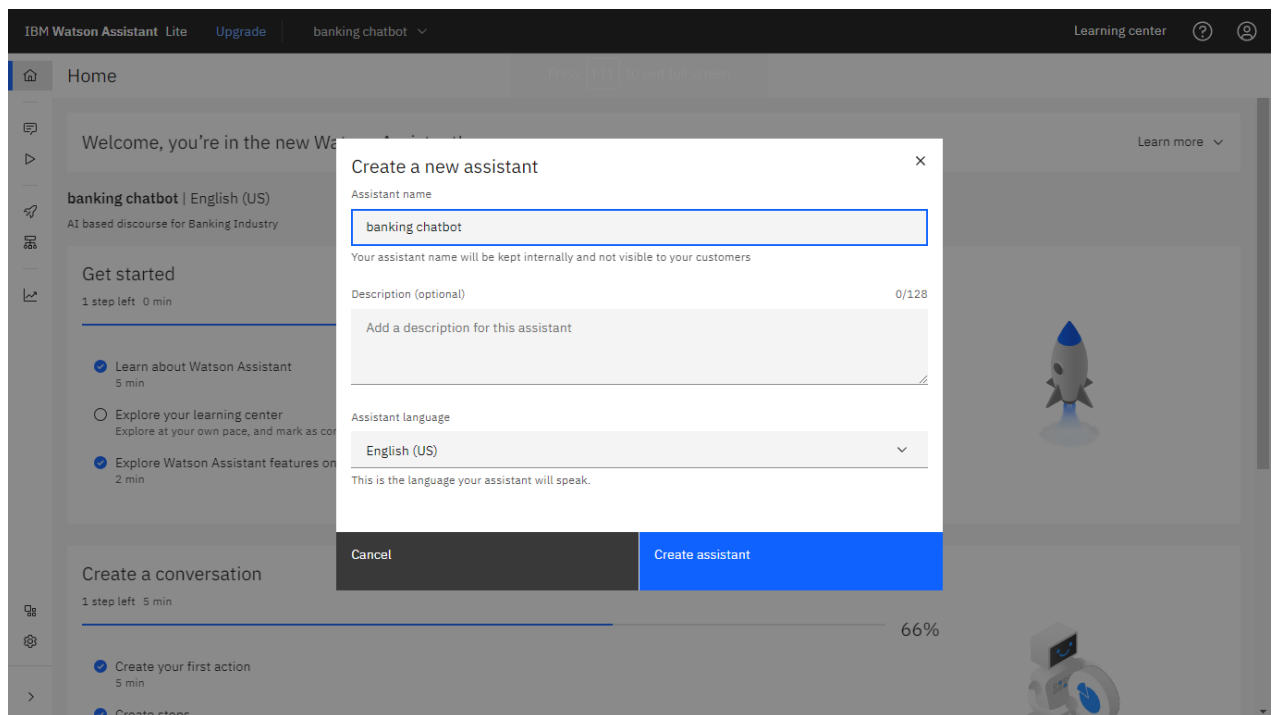

Delivery of Sprint - 1

Date	29 October 2022
Team ID	PNT2022TMID45515
Project Name	AI-based discourse for Banking Industry

Create IBM Service

In this activity, you will be creating the Necessary IBM service. The following are the service that you have to create.

Watson Assistant

The screenshot shows the IBM Watson Assistant interface. A modal dialog titled "Create a new assistant" is open. The dialog has a close button (X) in the top right corner. It contains the following fields and options:

- Assistant name:** A text input field containing "banking chatbot". Below the field, a note states: "Your assistant name will be kept internally and not visible to your customers".
- Description (optional):** A text area with a character count of "0/128". The placeholder text is "Add a description for this assistant".
- Assistant language:** A dropdown menu currently set to "English (US)". Below the dropdown, a note states: "This is the language your assistant will speak."

At the bottom of the dialog are two buttons: "Cancel" and "Create assistant".

The background interface shows the "Home" page for the "banking chatbot" assistant. It includes a "Get started" section with three steps: "Learn about Watson Assistant" (5 min), "Explore your learning center" (5 min), and "Explore Watson Assistant features on" (2 min). There is also a "Create a conversation" section with a progress bar at 66% and two steps: "Create your first action" (5 min) and "Create steps".

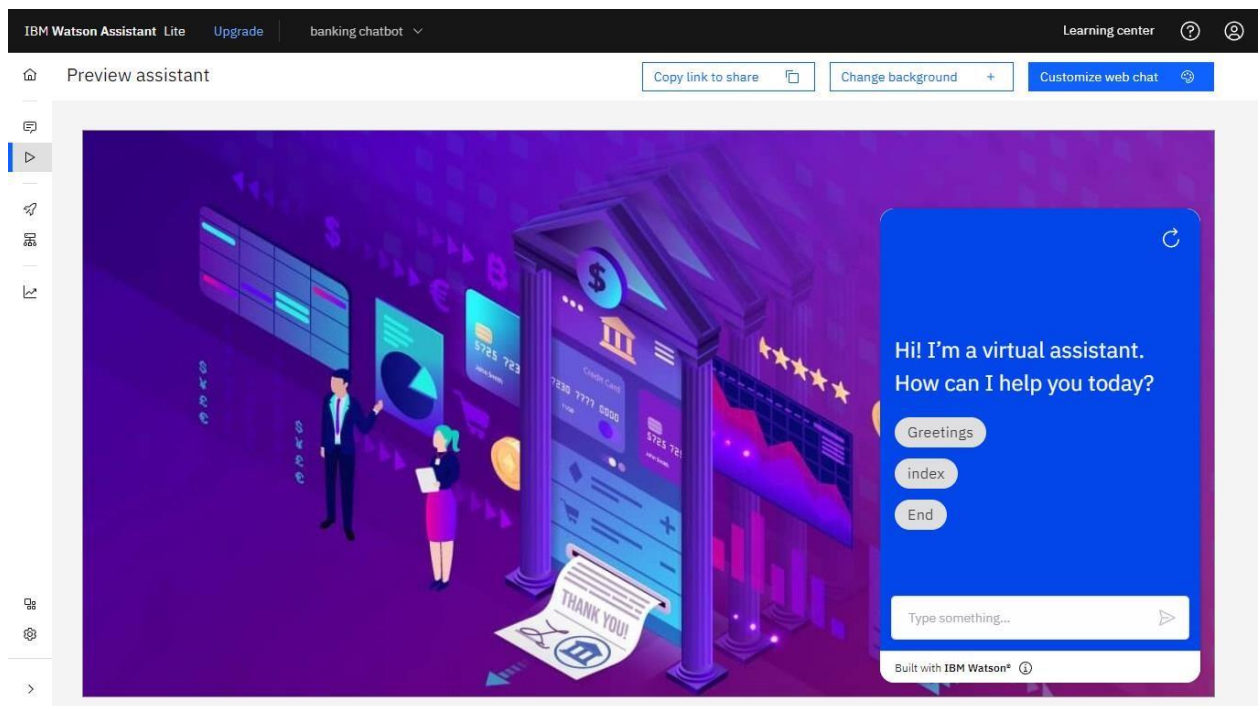

Creating Skills & Assistant For Chatbot

Skills are nothing but actions and steps. Steps are the subset of actions where conversations are built and Assistant is used to integrate skills

The screenshot shows the IBM Watson Assistant interface for a 'banking chatbot'. The top navigation bar includes 'IBM Watson Assistant Lite', 'Upgrade', 'banking chatbot', and 'Learning center'. The main content area is titled 'Savings' and shows a 'Customer starts with:' section with a dropdown menu set to 'Savings'. Below this, the 'Conversation steps' section displays a list of steps for creating a savings account. Step 1 asks 'which type of saving account do you want create?' with options 'zero savings ...', 'kids saving a...', and '+ 1'. Step 2 shows a 'Regular saving account' selected, followed by a 'Free text' input field. Step 3 shows a 'kids saving account' selected, followed by another 'Free text' input field. A 'New step +' button is at the bottom left, and a 'Preview' button is at the bottom right.

A default template chatbot is created. Need to add actions.

The screenshot shows the IBM Watson Assistant interface with a 'Create a new assistant' dialog box open. The dialog has a title bar 'Create a new assistant' and a close button. It contains fields for 'Assistant name' (set to 'banking chatbot') and 'Description (optional)' (set to '0/128'). Below these fields is a section for 'Assistant language' with a dropdown menu set to 'English (US)'. At the bottom of the dialog are 'Cancel' and 'Create assistant' buttons. The background shows the 'Home' page of the assistant, with a 'Welcome, you're in the new Watson Assistant' message and a 'Get started' section with three steps: 'Learn about Watson Assistant', 'Explore your learning center', and 'Explore Watson Assistant features on the console'. A progress bar at the bottom indicates 66% completion.

Note: No code for this project. So, I attached the screenshot and step to build it.
